REMARKS:

All surfaces within the primary enclosure must be replaced or repaired when worn or damaged. Dirty, rough and absorbent materials protect microorganisms and are difficult to clean, disinfect and deodorize. Damaged areas of kennels must be repaired or replaced to prevent dogs from ingesting any materials that may come loose from chewing and clawing the enclosure. Due to its porosity, concrete must be treated with a liquid sealer or hardener to make it waterproof. Waterproofing prevents water damage to concrete and allows thorough sanitization.

Records must be complete at the time of inspection. This often is accomplished by communication between the municipal offices, the contracted shelter and the DCO. According to Article 7, Section 113.4, every dog control officer, peace officer, when acting pursuant to his special duties or police officer shall promptly make and maintain a complete record of any seizure and subsequent disposition of any dog. This includes the date of disposition, regardless of the type of disposition (redemption, transfer, adoption, euthanasia).

According to Article 7, Sections 117.4 and 117.6, the DCO or shelter cannot release an "Article 7" dog unless the owner shows proof of a current license and proof that the correct impoundment fee has been paid; the new license number issued must also be recorded in order to determine compliance at the time of inspection. As discussed at the inspection, even if the dog is harbored in a different municipality or state, the owner must provide proof of licensing before release. A current license from another municipality/state is acceptable. If there is no licensing entity in the municipality where the dog is harbored, then the dog can always be licensed to wherever it is currently staying (e.g. a family member, campground/seasonal or friend's address) or even the town/city hall's address, but it MUST have a current license in order to be released.

Although licensing is not normally required until a dog reaches four months of age, if the dog becomes at large and is subsequently seized, then it must have a license issued before it can be released from the shelter (Article 7, Section 109.1a). If the seized dog is at least 12 weeks (three months) old, it can be vaccinated for rabies and licensed as usual. If the dog is less than 12 weeks old, then the clerk can issue a license that states "too young for rabies vaccination," and change the renewal date for whenever the dog reaches an appropriate age to be vaccinated.
