These are the findings of an inspection of your facility on the date(s) indicated above:

1. Shelter is structurally sound	Yes
2. Housing area and equipment is sanitized regularly	No

Framing of the guillotine doors within many of the kennels is corroded by rust that cannot be properly cleaned and sanitized (kennels #1-8 on the right side of the aisle, and kennels #1-3, 5 & 6 on the left side of the aisle). The concrete block wall of the exterior wall between kennels #5 & 6 on the right side has an area at floor level that is eroding away. The porous nature of unsealed concrete means this cannot be properly cleaned and sanitized. The frame of the exterior chainlink door of kennel #5 on the right side has pitted rust at floor level, and cannot be properly cleaned and sanitized.

3. Repairs are done when necessary	No

REMARKS:

All enclosures housing seized dogs must be structurally sound and kept in good repair to keep the dog contained and to protect it from injury. There must be no rust, jagged edges or sharp points. Damaged areas of kennels must be repaired or replaced to prevent dogs from ingesting any materials that may come loose from chewing and clawing the enclosure.
