REMARKS:

An unannounced inspection of the shelter was done. The kennel was dirty and dusty inside. There were a food and a water dish in one kennel. Both had mouse droppings in them. The outdoor run for the same kennel was smeared with dried fecal material. The dog doors to the outdoor kennels are not "flush" with the opening which will allow cold air in during the winter months.

It is recommended that the kennel be maintained so that it is clean and remains structurally sound. Running water should be available so a hose can be used to clean the kennels and runs.
