## REMARKS:

The dog shelter is satisfactory for now. There is some warping of the outside part of the kennel constructed with wood. Dogs have chewed quite a bit of the wood that is around the inside doors. One of the kennels needs some wire repair on the outside. Since there was never a drain in the kennel; there is some water damage that has occurred over time. It is recommended that some thought be given as to how to make sure the kennel remains structurally sound over the next five years.

The dogs are well cared for during their stay in this shelter.
