These are the findings of an inspection of your facility on the date(s) indicated above:

1. Shelter is structurally sound — No

Eight outdoor runs at the rear of the kennel and eight outdoor runs at the front of the kennel building; the pipes that comprise the door frames that the chain link is attached to, are rusty, broken and have jagged edges at both corners at the bottom of the door, and the pipe that connects the corners at the bottom of the door are severely rusted. These areas pose a risk of injury to the dogs contained therein and cannot be effectively cleaned and disinfected.

2. Housing area and equipment is sanitized regularly — Yes

3. Repairs are done when necessary — No

Bolts sticking out from the concrete around the door openings in the outdoor runs need to be removed. Several areas in the concrete of the outdoor runs, where there are large cracks, chips and holes need to be filled in. Four outdoor freestanding kennels have several areas of loose and broken wire, and exposed sharp pipes (where patches have been attempted) that need repair.
