REMARKS:

It was recommended that the cages with rusty areas be replaced with the newer metal cage sides that have been purchased. It was also recommended that the electrical switches get covers and that the upper part of the interior walls be completed as soon as possible.

Other suggestions include the purchase of new food and water dishes and to clean or purchase new comfort "riser beds" that allow the dogs to lay comfortably above the concrete floor. Some of them are worn, broken or dirty.

The kennel looked to be clean. There were no dogs housed in the kennel at the time of my inspection.
