REMARKS:

The shelter was physically inspected on 11/30/15 with Animal Control Officer Bill McGuigan. The office manager was not available at the time. Complete paperwork was reviewed with the office manager on 12/2/15. Seizure and disposition information is maintained on an original document and then copied onto a log form. The same information is then entered on a computer program. It was discussed that when the office manager is off, another staff member must be able to access the records and have knowledge of the recording system.

Impoundment fees are set by resolution of the Ontario County Legislature and include seizure and boarding fees. The boarding fee was not consistently collected. It was discussed that fees are to be applied as provided for in the resolution in order to be fair and equitable to all.

Cinder blocks that makeup the dog runs were damp from cleaning. Mortar was missing between some cinder blocks. It was discussed that repairs to the block and application of a sealant would make surfaces impervious to liquids that cause damage. Impervious surfaces are also resistant to the accumulation of organisms that can cause disease. Resistant surfaces also dry off faster which reduces humidity and provides a more comfortable environment for the animals.
