These are the findings of an inspection of your facility on the date(s) indicated above:

A. Standards of Care

1. Shelter is structurally sound	Yes
While the building is structurally sound there are many kennels that are not. See note under "repairs done when necessary". The framework around the doors mentioned would allow for potential harm to a dog or possible escape.

Evidence of rodents throughout the kennel area.	
3. Repairs are done when necessary	No
Many kennels throughout the facility (2nd room in and also main kennel area) have screws protruding into the dog's living area. Many kennels in the main kennel room have broken framework around the doors. I also noted that kennel #11 had paint peeling off from the wall. One large kennel in the isolation area has walls that are torn apart with sharp edges. This kennel is currently not in use.
