REMARKS:

One dog was present at the time of the inspection. Due to the malfunctioning furnace, the dog was moved to a different kennel that had a heat lamp installed in it.

On previous inspections, three kennels had been approved for use as the others need significant repair. The inspector noticed on this inspection that the outside kennel door on one of the approved kennels had been damaged and a grate installed over the area. This kennel should not be used until the chain link has either been repaired or replaced. Therefore, the shelter now has two kennels that are approved for housing.

Seizure record for dog being housed was on file at the shelter. Records for any other dog that has been sheltered at the facility between inspections should also be on file at the shelter.
