REMARKS:

**All enclosures housing seized dogs must be structurally sound and kept in good repair to keep the dog contained and to protect it from injury. There must be no rust, jagged edges or sharp points. Damaged areas of kennels must be repaired or replaced to prevent dogs from ingesting any materials that may come loose from chewing and clawing the enclosure. Wood must be sealed if it is used for walls. Due to its porosity, concrete must be treated with a liquid sealer or hardener to make it waterproof. Waterproofing prevents water damage to concrete and allows thorough sanitation.**
