**REMARKS:**

**DCO Constantino has a covered outdoor shelter with access to an interior space. The interior space is heated by a wood stove located on the other side of the wall. The interior space is not large enough to adequately accommodate all sizes of dogs, nor does it have a baffled door to keep heat contained inside the interior space. Due to these factors, this shelter space is not permitted to be used for unacclimated dogs or in inclement weather. In the event of inclement weather or for an unacclimated dog, DCO Constantino has a large wire kennel he can assemble in a heated area of his home, out of the way of general traffic and personal pets.**

**Damaged areas of kennels must be repaired or replaced to prevent dogs from ingesting any materials that may come loose from chewing and clawing the enclosure. Wood must be sealed if it is used for walls. Junctions with the floor, ceiling and doors must be aligned and properly sealed, as well.**
