

Conservation Systems and Reportable Units for the NYS Agricultural Nonpoint Source
Abatement and Control Program*

Conservation System	Approval Date	Reportable Units	Notes
Access Road Improvement	7/91	Feet	
Alternative Water Supply	7/95	Number	Should be claimed every time a water system is installed even if Prescribed Grazing (with 5 or more paddocks) is also claimed.
Barnyard Runoff Management System	7/91	Number	
Conservation Tillage	7/91	Acres	
Constructed Wetlands	7/91	Acres	
Contour Farming	7/91	Acres	
Cover & Green Manure Crop	7/91	Acres	
Critical Area Protection	7/91		
- Vegetative Crop	7/91	Acres	
- Streambank & Shoreline Protection	7/91	Feet	
Crop Rotation	7/91	Acres	
Diversions	7/91	Feet	
Fencing	7/91	Feet	A "Fencing" system should be claimed when fence is truly the major practice such as when livestock is excluded from a water course or cropland has been converted to pasture and a prescribed grazing system involving 5 or more paddocks is not being implemented.
Filter Strip	7/91	Acres	
Integrated Pest Management	5/94	Acres	Be specific in identifying the actual system implemented.
- Biological Controls	5/94	Acres	
- Cultural Practices	5/94	Acres	
- Resistant Crop Varieties	5/94	Acres	
- Scouting	7/95	Acres	
- Trap Crops	7/95	Acres	

Conservation System	Approval Date	Reportable Units	Notes
Irrigation Water Management	2/2007	Acres	
Milking Center Waste Water Treatment	2/2007	Number	
Nutrient Management Planning	2/2007	Acres	Be specific in identifying the actual system implemented (i.e. – if a manure storage is implemented identify the system as a Manure Storage and not Nutrient Management Planning). Structures such as bedded pack barns, temporary storages, and stacking pads should be claimed as a Manure Storage.
- Anaerobic Digestion	7/95	Number	
- Composting	4/98	Number	
- Feed Ration Evaluation & Balancing	4/98	Number	
- Manure Storage System	4/96	Number	
- Sequence Batch Reactor	4/98	Number	
Nutrient/Sediment Control System	7/91	Number	
Pathogen Management	4/96	Number	
Pasture Management: Prescribed Grazing System	7/95	Acres	This system can only be claimed if the system includes 5 or more paddocks that will have no more than a 7 day residency in any one paddock. Temporary fence may be used to establish paddocks.
Pesticide Management	2/2007	Acres	Be specific in identifying the actual system implemented (i.e. – if an agrichemical mixing facility is implemented identify the system as an Agrichemical Mixing Facility and not Pesticide Management).
- Agrichemical Mixing Facility	2/91	Number	
- Calibration & Application	2/2007	Number	
-Evaluation of Site Specific Leaching & Surface Loss Potential	9/91	Acres	
-Pesticide Applicator Education & Training	5/94	Number	
-Read & Follow Label Directions	9/91	Number	
Petroleum Product Storage Spill Prevention & Containment	4/96	Number	
Riparian Buffer	7/91	Acres	

Conservation System	Approval Date	Reportable Units	Notes
Silage Leachate Control	7/95	Number	
Stripcropping	7/91	Acres	
Terraces	7/91	Feet	
Waterway	7/91	Acres	

*This chart is an addition to the Agricultural Management Practices Catalogue for Nonpoint sources Pollution Prevention and Water Quality Protection in New York State for the purposes of reporting Best Management Practice System Units for AgNPS Program proposals (starting with Round 18), plans of work (starting with Round 17) and all close outs filed after March 1, 2011.
