

Question: You stated the tags must be able to survive extreme conditions but it says less than a \$1.00 per tag is this a typo error or do you really think you can get a tag like that for less than a \$1.00

Answer: The conditions under which tags must be able to survive are described in the RFP document. As stated in the RFP, the cost of RFID tags must not exceed \$1.00 per tag.

---

Question: Please confirm that we don't have to attend any mandatory conference so that we don't miss any deadlines.

Answer: There is no mandatory conference.

---

Question: Do you have a photo of the crate it self and what are dimensions of the crate.

Answer: The dimensions of a typical crate are 35" x 23 ½" x 10 ¼". Below is a picture of a typical poultry crate (transportation coop).

Question: Will the dimensions of the crate and possibly a photo of the crate be made available?

Answer: See answer to similar question above.

---

Question: Would NYS Dept of Agriculture consider a more expensive tag that can hold more complete crate chain of custody data on the RFID tag itself?

Answer: As stated in the RFP, we are seeking RFID tags that cost less than \$1.00 each. If none of the bidders are able to meet this requirement, then proposals received by the Department indicating a higher cost per tag may be given consideration.

---

Question: Does the department have any plans to integrate the location information from the origin farm, distribution or market locations into any GIS-based applications at this time, as a part of this project? The Department's GIS resources are within the Division of Information Systems, correct? If so, would the department please provide more details on that planned integration?

Answer: There are no plans at this time to integrate location information into a GIS-based application at this time, as part of this project. The Department's GIS resources are within the Division of Information Systems.
